SUMMARY

An energetic front-end developer who is willing to work alongside other talented IT professionals and has passion for building responsive websites and apps to the very highest standards. For 4.5 years has been interested in building websites and apps for the web.

Started with simple pages with HTML and CSS then added JS and then JQuery. Right now, code with React library. At the moment, is looking for a front-end position with an exciting company. Let's create something good and special.

EXPERIENCE: **Portfolio**

SKILLS

- Writing readable, reliable, scalable and maintainable code. Implement responsive, accessible websites and SPAs from the ground up
- Strong HTML skills, and an ability to create elegant, semantically clean mark-up
- Good knowledge of CSS, SCSS, CSS modules, styled-components and BEM
- Knowledgeable in ES5, ES6+ and React
- Understanding of key design principles and being able create decent looking layouts that is a delight to experience on any device
- Handling criticism well and learning from it
- Enjoy working together in solving problems
